IN THE SPECIFICATION:

Please amend paragraphs 0007 and 0009 of the specification as follows:

[0007] In this case, it may furthermore be provided that the random access memory is furthermore refreshed in the time segments. This refinement can be developed such that in the control time segments preceding the writing or reading, the following code sequence is fed to the random access memory: NOPS NOPs (No Operations), PALL (Precharge All Banks), NOPs, REF (Auto-Refresh Command), ACTV (Bank Active (RAS)), ACTV, NOPs.

[0009] In a method embodied in practice, it was furthermore provided that in the control time segments after writing or reading, the following code sequence is fed to the random access memory: BST (Burst Stop), PALL, REF, NOPs.
